Name of school:	Name of Principal:
Number of teachers:	Number of students:
Postal Address:	
Ph:	Fax:
School Email:	
Lead teacher for Enviroschools:	Email:

Checklist for Schools	✓
1. Our school has a copy of the Enviroschools Handbook	
2. Staff member/s have attended an Enviroschools introductory workshop and the staff have explored how the Enviroschools approach could work in our school.	
3. Our Principal, Board of Trustees and staff have read and understood the Enviroschools Agreement and are ready to make the long term commitment to a sustainability journey that this agreement signifies.	
4. We have attached a brief description of why our school wants to become an enviroschool.	

Please also attach the following to help us understand the support needs of your school.

5. A description of your school's previous involvement in environmental projects and what you see as the next steps on your environmental journey (this helps us make connections where appropriate with other schools engaged in similar projects).	
6. Any environmental policies your school currently has (There is no expectation that you have these already, however, they are a useful thing to see if you have them. If you have none just place a cross in this box).	
7. A list of Ministry of Education Contracts your school is currently involved in (this helps us to work collaboratively with other advisors who may be working in your school so that we can try to minimise overload for your school).	
8. A list of community agencies your school works with (again this helps us to collaborate as above to reduce overload for your school).	

Finally, we recommend you locate your school's copy of the Ministry of Education 'Guidelines for Environmental Education in NZ Schools'. (All schools should have a copy of these but they are also available at www.efs.tki.org.nz – under the curriculum resources and tools archive).
